Food Contact Safe Packaging Statement

Maid-Rite Specialty Foods, Inc. guarantees and warrants that all IQF fully cooked and IQF raw intact and non-intact meat products we produce are packaged using materials that prevent adulteration or contamination and comply with all applicable federal, state, and local regulations, as well as recognized good commercial practices.

All labels affixed to packages accurately describe the contents and comply with all regulatory and customer requirements.

Maid-Rite Specialty Foods, Inc. further certifies that all paper, plastic, and film-based food-contact packaging materials used in our operations are, as of the date of shipment, not adulterated or misbranded within the meaning of the Federal Food, Drug, and Cosmetic Act and conform to applicable FDA food-contact regulations.

The materials used in packaging our food products meet the requirements of Title 21 CFR as follows:

- Paper Packaging: 21 CFR 176.170 & 176.180
- Adhesives: 21 CFR 175.105
- Plastic & Film Packaging: 21 CFR 177.1520 and applicable 21 CFR 177.xxx & 178.xxx

Packaging materials are intended for direct contact with IQF fully cooked and IQF raw intact and non-intact meat products, all classified as proteinaceous and fatty food types. These materials are suitable for IQF freezing, frozen storage, distribution, and standard packaging operations such as bagging, sealing, film overwrap, and cartonization.

Packaging materials do not intentionally contain harmful or restricted substances such as heavy metals, BPA (unless disclosed), or restricted phthalates. They are not made with natural rubber latex and contain no known major food allergens as defined by the FDA.

This guarantee remains in effect until amended or revoked in writing by Maid-Rite Specialty Foods, Inc.
